DATE: 1 JULY 1988

PAGE 1 OF 1

TO: ALL OWNERS AND OPERATORS OF MCDONNELL DOUGLAS HELICOPTER COMPANY (MDHC) 369 SERIES HELICOPTERS.

IMPROVED FUEL DRAIN VALVE ASSEMBLY.

MDHC has developed an improved fuel drain valve assembly (P/N 369D28099) which replaces the existing CAV170-H4 fuel drain valve. The improved drain valve incorporates a backup washer behind the valve closure O-ring. The O-ring used for installing the valve itself is MS29513-012. The O-ring used as the quick drain closure seal is MS29513-006. Improved fuel drain valve assemblies and associated O-rings are currently available from the Spares Department at MDHC.

A handwritten signature in black ink, appearing to read 'Cary Brown'.
